About Movals Logistics

COMPANY OVERVIEW

Movals Logistics India Pvt. Ltd. is a subsidiary of Reliance Gulf, built to bring the same operating discipline Reliance Gulf applies to Energy, Industrial and Infrastructure projects into everyday transportation, warehousing and distribution across India.

That means treating every shipment like a project: planned, tracked and closed out properly, not just moved and forgotten. The company works across transportation, warehousing and distribution, and builds each solution around what a client's operation actually needs rather than fitting the client into a standard package.

Registered as Movals Logistics India Private Limited (CIN U52219RJ2023PTC086791), the company operates from Noida with a branch office in Neemrana, Rajasthan, placing it directly inside two of India's busiest industrial corridors.

ENTERPRISE CLIENTS

SCOPE NOTE

This profile replaces earlier versions circulated previously. Partner and fleet listings reflect active accounts only. Names no longer working with Movals Logistics have been removed from this edition.

Vision & Mission

STRATEGY

OUR VISION

Partners, not just transporters.

Our business philosophy is to constantly exceed client expectations by holding a standard of excellence in transporting goods: on time, safely, and cost effectively. Once we understand a client's operations well enough, we stop being a vendor they call and start being a partner they plan around.

MISSION

To be a profitable provider of logistics solutions that create real strategic value for our customers, and to build a company capable of attracting, recruiting and keeping talented people. Movals Logistics is built around long-term partnerships with clients and industry partners, backed by reliable delivery and steady, profitable growth.

The longer-term aim is to become a significant name in the Asian transport industry, staying ahead of client demand and offering cost-effective solutions as that demand grows.

Core Values

OPERATING PRINCIPLES

Four principles run through every account we manage. Not slogans on a wall, but what we actually check ourselves against.

Integrity

We conduct business fairly, with honesty and transparency that can stand up to public scrutiny. Every client relationship runs on the same ethical standard, which is what lets it last.

Excellence

We hold ourselves to the highest standard in day-to-day execution and in the quality of what we deliver. Regular communication with clients means problems get caught and corrected early, and don't resurface.

Understanding

We take the time to understand a client's business and operations through regular interaction, not just their shipment list. That is what lets us deliver a service that actually exceeds expectation instead of just meeting a spec sheet.

Unity & Responsibility

We work cohesively across our own teams and with clients and partners worldwide, built on tolerance, understanding and mutual cooperation. That responsibility extends to the communities and environments we operate in.

Our Services

SERVICE LINES

SIX SERVICES, ONE POINT OF CONTACT

Everything between origin and delivery.

Efficient transportation, warehousing and distribution, customized to what each client actually needs and backed by the technology and equipment to keep operations cost-effective.

Transportation

Transportation solutions are built around a client's specific business need, not a generic route sheet. Raw materials, finished product or heavy equipment, shipments are handled by a team with the resources to get it there on time and in the condition it left in.

Logistics Management

End-to-end visibility and tracking gives clients real-time access to their shipment data, not a status update after the fact. That visibility is backed by a network of carriers and industry partners, so cost-effectiveness and reliability hold up at every stage.

Supply Chain Management

Supply chain solutions are shaped around how a client's operation actually runs, so day-to-day movement stays smooth and efficient

Freight Forwarding

Our logistics team works directly with clients to understand what actually needs moving and when, then builds a solution around that instead of fitting the client into a standard package. The result is transportation that consistently arrives on time and intact.

Carrier Services

A full range of carrier services covers whatever transportation need a client has, built to get goods to their destination on time and in perfect condition. Reliability here is not a claim, it is the baseline we are measured against on every job.

Specialized Transportation

Some cargo does not move like everything else: oversized equipment, heavy industrial loads, sensitive electronics. Specialized

rather than reactive. Supply chain management touches nearly everything else a business does, which is why it gets a dedicated solution, not an add-on.

transportation solutions are built for exactly that kind of need, so the goods that are hardest to move get the most care.

Our Process

ONBOARDING

Four steps, the same four steps every time. No client gets treated like a rush job.

01	Initial Consultation DISCOVERY	A first conversation to understand cargo, timelines, budget and constraints, before anything gets proposed.
02	Proposal SCOPING	A customized proposal covering the transportation solution, cost breakdown and timeline specific to that client.
03	Contract AGREEMENT	A contract defining scope, responsibilities on both sides and terms, before any vehicle moves.
04	Onboarding GO-LIVE	Access to the tracking system, scheduled transportation and a coordinated team, so the relationship runs from day one.

Why Movals

COMPLIANCE

Every initiative runs inside the compliance and guidelines set by the Indian Government.

Fleet taxes and formalities are cleared by a dedicated compliance desk before a vehicle is ever assigned a job. All necessary taxation formalities are completed with both the OEM and the government before a vehicle is rolled out for commitment. Before a vehicle is handed over to a driver, it clears a fixed set of checks, the same checks, every time.

- ✓ Correct documents handed to the driver, checked in full
- ✓ En-route expenses and bank transfer details briefed and handed over
- ✓ Branch personnel hierarchy briefed to the driver
- ✓ Driver briefed on providing tracking reports to Branch Manager and Head Office
- ✓ Real-time tracking active to Head Office
- ✓ Vehicle condition physically verified, any issue discussed with the driver directly
- ✓ Dispatch matched against chassis number, engine number, TC paperwork and inventory condition

WHY THIS MATTERS

A compliance failure on the road is a client's problem before it is ours. Running this checklist on every vehicle, every time, is what keeps it from ever becoming either.

Leadership

MANAGEMENT

Anand Kumar Sinha

MANAGING DIRECTOR · MOVALS LOGISTICS INDIA PVT. LTD.

Anand Kumar Sinha brings over 23 years of logistics and supply chain experience built across leading multinational companies. Over the course of his career he has run end-to-end supply chain operations, shaped logistics strategy, and led business transformation initiatives across a range of industries.

Before founding Movals Logistics, he headed Logistics & Supply Chain Management at his previous organization, where he planned and ran domestic and international logistics operations. His work has spanned transportation management, warehousing, inventory control, import-export logistics, customs coordination, freight optimization, vendor management, and process improvement across the supply chain.

He has managed complex logistics networks spanning both domestic distribution and global export, balancing regulatory compliance, cost control, operational efficiency, and customer satisfaction along the way. He has led cross-functional teams, brought in industry best practices, and built logistics strategies designed to support real business growth.

Today, as Managing Director of Movals Logistics, Anand is focused on building reliable, cost-effective, technology-driven logistics solutions that fit each client's specific needs. His approach centers on long-term partnerships, backed by transparency, quality, and operational excellence at every step.

Leadership

MANAGEMENT

Shyam Narayan Yadav

CEO & DIRECTOR, MOVALS LOGISTICS · FOUNDER, CEO & MD, RELIANCE GULF GENERAL CONTRACTING, UAE

Shyam Narayan Yadav is a seasoned entrepreneur and business leader with deep experience across engineering, contracting, infrastructure development, logistics, and strategic management. He founded and now leads Reliance Gulf General Contracting as CEO and Managing Director, delivering engineering, procurement, construction, industrial maintenance, and infrastructure solutions across the UAE, Oman, and India.

Under his leadership, Reliance Gulf has built a strong track record executing high-value projects in Energy, Industrial, Oil & Gas, Infrastructure, and Construction. His focus on quality, safety, innovation, and on-time delivery has helped the company build lasting relationships with clients and partners across the Gulf region.

Alongside this, Shyam serves as CEO & Director of Movals Logistics India Pvt. Ltd., where he drives the company's strategic growth, operational performance, and customer-first approach to logistics. He is focused on expanding Movals' footprint in domestic and international logistics, supply chain management, freight forwarding, transportation, warehousing, and integrated logistics solutions.

With an entrepreneurial mindset and a forward-looking approach, Shyam has led business expansion across multiple countries while pushing innovation, efficiency, and sustainable growth at every step. His leadership is built around integrity, collaboration, and consistently delivering value to customers, partners, and stakeholders.
